

IBIS

Infant Brain Imaging Study

Brain Development in Autism

About Our Study

The goal of this NIH-funded brain imaging study is to identify symptoms of autism sooner.

Who Is Eligible?

We're looking for families who have an infant (0 to 6 months old) and at least one older full sibling diagnosed with autism. Expectant parents are encouraged to contact us.

About Your Visit

Your infant and a parent will:

- Travel to Chapel Hill when infants are 6-months, 12-months, and 24-months old
- Infants complete developmental testing and MRI scan
- MRI scans are completed while infants are naturally sleeping without sedation
- Reimbursement for study related expenses and up to \$155 compensation per visit for participating

Contact Us

For additional information or to enroll, call Cloie Dobias at 919-962-5942 or email ibisnetwork@cidd.unc.edu. Visit the IBIS website for more information at ibis-network.org
