

Are you an autistic adult between 22-65 years old who lives in North Carolina?

Participate in a virtual research study looking at how social and community connections relate to mental health in autistic adults.

Our study lasts 3 months and involves:

- 2 online surveys
- 3 video interviews
- Carrying a GPS tracker & completing social diaries for 1 week
- Up to \$110 in compensation

You can participate in the video interviews verbally or non-verbally (using the chat function).

To see if you might be eligible, please contact us at:
